

## IN THE NAME OF TRUTH

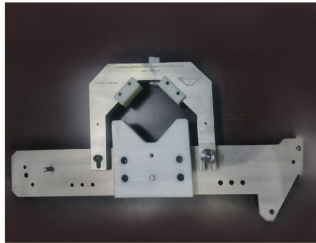

SABA is an epic ancient Persian bird, the symbol of excellency and wisdom combined with the precision required for a big bird to dominate the skies just like an airplane, we dared naming ourselves this, to guarantee keeping your birds safe in the high sky. We are SABACO.

This science based group, empowered with its prodigies, all the engineers and doctors solely co-operating together in different fields spoken as SABAMED in medical and dental industry, SABA AVIATION in aeronautics for all kinds of airplanes and helicopters, excelled in production and design of all kinds of special tools required to maintain and overhaul all aircraft types and categories and all the required consultations and the information our customers might be needing, is mentioned expandedly below.

Branded as a pioneer in Iran's market having worked with big companies, we are privileged to say that our remedy is to ease the labor and to reduce the cost exposed to the companies to a large extent. Here are the categories:

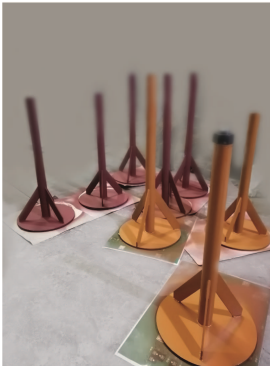

1. jet engine special tools for complete overhaul procedures including TEST, DISASSEMBLY, CHECK, REPAIR, ASSEMBLY.

the jet engine projects done by this company are :

CFM56 SERIES  
PW4000 SERIES  
PW100 SERIES  
TRENT500 SERIES  
V2500 SERIES  
LF500 SERIES  
JT8D SERIES  
CF6 SERIES  
TFE731 SERIES  
CF34 SERIES

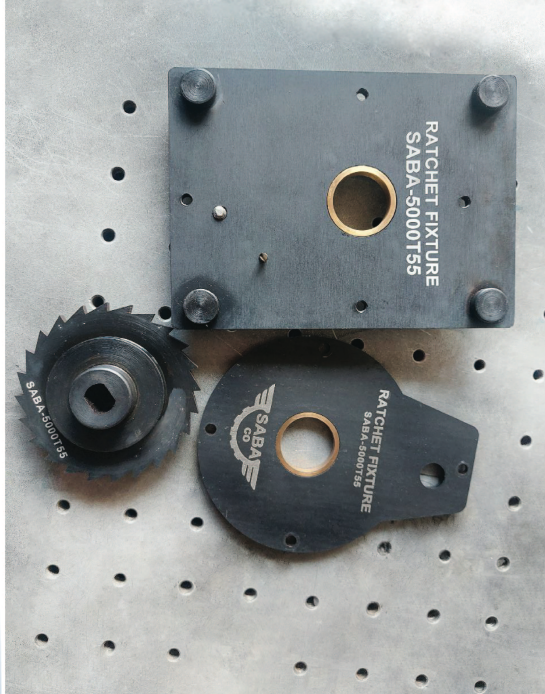

2. the original APU special tools and fixtures coming with all the required educational info and consultations to overhaul and disassemble these power units for the airplanes like B737 ,A320 :

HONEY WELL GTCP 36  
HONEY WELL GTCP85  
HONEY WELL 131  
APS 3200

3· design and making of all special tools for hydraulic and pneumatic systems :

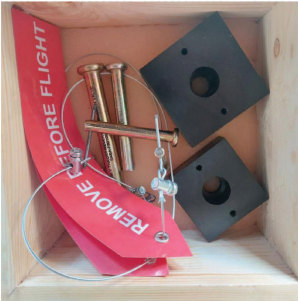

4· design and making of all special tools for landing-gear and actuator systems :

5. design and making of all special tools for fixtures, engine component parts and fuselage :

6- design and making of all kinds of test benches and testers like hydraulic and Fuel test benches :

7. the ability to design and make all type of ground tools and stands  
all different types of jacks :

NITROGEN CART:

\* custom airplane jacks like:

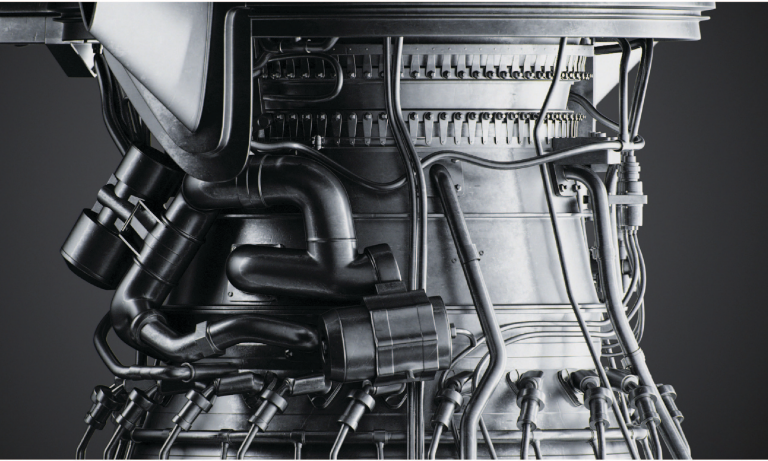

MLG, NLG, AXLE JACK, WING & TAIL JACK, (TRIPOD JACK)

8. design and making of all hanger and airport tools :

9. design and making of all kinds of arbors and fixtures for the purpose of Balancing:

10 . all kinds of services for inspect and repair procedures :

\* according to the highest international standards (ISO,DIN,JIS ,AMS)  
all of our special tools come with its final book including the licenses  
of engineering geometric dimension sketches, the processes being  
applied on the tools like heat treating, the coating info, material analyze,  
software analyze of the structure ,pressure and tensile strength tests  
,dead load test,welding test and one year guaranty which all the tools  
with their part numbers hacked will be delivered into their safe and  
strong wooden packaging .

In the end,

- our company is vowed to work always by some rules to reach its pictured elysium.
- The first fundamental priority is what the customer needs .
- Our quality is worldwide no mater working small or big .
- Lowest profit possible , no company can compete.if so,we start negotiating to keep our record of being the lowest .
- Lowest time possible is our obsession, not effecting the quality no doubt .
- Always open to any offer , comments and suggestions .
- Trustworthiness is what we keep sacred and seek .
- What we do is to guarantee the safety and excellency of your SABA .
